

Freezing, Melting and Evaporating Study Guide

1. Know the 3 states of matter.
2. Know the phase changes that occur during freezing, melting and evaporating.
3. Know what happens when you add or remove heat from the different states of matter.
4. Know the factors that affect the rate of freezing, melting, and evaporating.
 - a. Freezing –
 - b. Melting –
 - c. Evaporating –
5. Be able to answer questions about the water state change graphs below.
